Nine Films About Technology

Camilla Rothe

Nine Films About Technology:

Films from the Future Andrew Maynard, 2018-11-15 Deftly shows how a seemingly frivolous film genre can guide us in shaping tomorrow's world. Seth Shostak, senior astronomer at SETI Institute, artificial intelligence, gene manipulation, cloning, and interplanetary travel are all ideas that seemed like fairy tales but a few years ago. And now their possibilities are very much here. But are we ready to handle these advances? This book, by a physicist and expert on responsible technology development, reveals how science fiction movies can help us think about and prepare for the social consequences of technologies we don't yet have but that are coming faster than we imagine. Films from the Future looks at twelve movies that take us on a journey through the worlds of biological and genetic manipulation, human enhancement, cyber technologies, and nanotechnology. Readers will gain a broader understanding of the complex relationship between science and society. The movies mix old and new and the familiar and unfamiliar to provide a unique, entertaining, and ultimately transformative take on the power of emerging technologies and the responsibilities they come with.

Fright Night on Channel 9 James Arena, 2011-12-22 From 1973 to 1987, *Fright Night* was a fixture of the late Saturday evening schedule on independent New York television station WOR-TV. A genre fan's nightmare come true, the modestly produced showcase featured horror films, both classic and obscure, from Universal's *Frankenstein* series to such lesser-known delights as *Beast of Blood* and *The Living Coffin*. *Fright Night* suffered no delusions of grandeur and never claimed to be anything more than what it was: great entertainment on a Saturday night. This thorough, affectionate tribute to *Fright Night*'s glory days includes a complete listing of all films shown on the series, as well as discussion of WOR-TV's other horror movie programs from the 1970s and 1980s. Also featured are interviews with the major surviving players, including *Fright Night* creator Lawrence P. Casey.

The Big Nine Amy Webb, 2019-03-05 A call to arms about the broken nature of artificial intelligence and the powerful corporations that are turning the human-machine relationship on its head. We like to think that we are in control of the future of artificial intelligence. The reality, though, is that we, the everyday people whose data powers AI, aren't actually in control of anything. When, for example, we speak with Alexa, we contribute that data to a system we can't see and have no input into, one largely free from regulation or oversight. The big nine corporations—Amazon, Google, Facebook, Tencent, Baidu, Alibaba, Microsoft, IBM, and Apple—are the new gods of AI and are short-changing our futures to reap immediate financial gain. In this book, Amy Webb reveals the pervasive, invisible ways in which the foundations of AI—the people working on the system, their motivations, the technology itself—are broken. Within our lifetimes, AI will, by design, begin to behave unpredictably, thinking and acting in ways which defy human logic. The big nine corporations may be inadvertently building and enabling vast arrays of intelligent systems that don't share our motivations, desires, or hopes for the future of humanity. Much more than a passionate, human-centered call to arms, this book delivers a strategy for changing course and provides a path for liberating us from algorithmic decision makers and powerful corporations.

Science Course Improvements Projects National Science

Foundation (U.S.), National Science Foundation (U.S.), 1964 Frontiers of Thin Film Technology, 2000-11-07 Frontiers of Thin Film Technology Volume 28 focuses on recent developments in those technologies that are critical to the successful growth fabrication and characterization of newly emerging solid state thin film device architectures Volume 28 is a condensed sampler of the Handbook for use by professional scientists engineers and students involved in the materials design fabrication diagnostics and measurement aspects of these important new devices Make Room! Make Room! Harry Harrison, 2010-07-01 A detective hunts down a killer in a dystopian overpopulated NYC in this classic science fiction novel that inspired the film Soylent Green Originally published in 1966 Make Room Make Room imagines a world at the end of the twentieth century where Earth is so overwhelmed by rampant population growth that it teeters on the edge of self destruction In New York City alone thirty five million people are squeezed into its packed boroughs scrambling like rats for the world's dwindling resources The only food available is a product called soylent And while the government tries to maintain order the rich get richer and the poor stay underfoot Finding a killer in this broken world is one hell of a job But that's exactly what Det Andy Rusch has been assigned to do If he can stay alive long enough he might just solve the biggest case he's ever been on unless humanity finally fulfills its promise and destroys itself first *Materials Processing Technology II* Lian Cheng Zhao, Hao Wei Wang, Chang Fa Xiao, 2012-06-14 Selected peer reviewed papers from the 2nd International Conference on Advanced Engineering Materials and Technology AEMT 2012 July 6-8 2012 Zhuhai China *Materials Science and Technology VIII* Peerapong Pinwanich, 2015-08-18 Selected peer reviewed papers from the 8th International Conference on Materials Science and Technology MSAT 8 December 15-16 2014 Bangkok Thailand **Functional Thin Films Technology** Sam Zhang, Jyh-Ming Ting, Wan-Yu Wu, 2021-08-08 Functional Thin Films Technology features the functional aspects of thin films such as their application in solar selective absorbers fiber lasers solid oxide fuel cells piezo related areas catalysts superhydrophobicity semiconductors and trace pesticides detection It highlights developments and advances in the preparation characterization and applications of functional micro nano scaled films and coatings This book Presents technologies aimed at functionality used in nanoelectronics solar selective absorbers solid oxide fuel cells piezo applications and sensors Covers absorbers catalysts anodic aluminum oxide superhydrophobics and semiconductor devices Features a chapter on transport phenomena associated to structures Discusses transport phenomena and material informatics This second volume in the two volume set Protective Thin Coatings and Functional Thin Films Technology will benefit industry professionals and researchers working in areas related to semiconductors optoelectronics plasma technology solid state energy storages and 5G as well as advanced students studying electrical mechanical chemical and materials engineering **Female Narratives in Nollywood Melodramas** Elizabeth Johnson, Donald Culverson, 2016-09-09 This book investigates how identities for West African women are created and recreated through the broad interplay of Nollywood film viewing on social and individual levels Since many Nollywood films are freely accessible

online the role of online communities repurposes Nollywood films Female Narratives in Nollywood Melodramas addresses if this is a good or bad promoter of critical consciousness as many of the films depict the stifling of women The authors examine nine Nollywood melodramas through Black feminist cultivation audience reception and social identity theories Readers will gain an understanding of how Nollywood is a product and contributor to evolving processes of globalization Recommended for scholars of film studies communication African studies and women studies

A Companion to Ancient Greece and Rome on Screen Arthur J. Pomeroy, 2017-06-01 A comprehensive treatment of the Classical World in film and television A Companion to Ancient Greece and Rome on Screen closely examines the films and TV shows centered on Greek and Roman cultures and explores the tension between pagan and Christian worlds Written by a team of experts in their fields this work considers productions that discuss social settings as reflections of their times and as indicative of the technical advances in production and the economics of film and television Productions included are a mix of Hollywood and European spanning from the silent film era through modern day television series and topics discussed include Hollywood politics in film soundtrack and sound design high art and low art European art cinemas and the ancient world as comedy Written for students of film and television as well as those interested in studies of ancient Rome and Greece A Companion to Ancient Greece and Rome on Screen provides comprehensive current thinking on how the depiction of Ancient Greece and Rome on screen has developed over the past century It reviews how films of the ancient world mirrored shifting attitudes towards Christianity the impact of changing techniques in film production and fascinating explorations of science fiction and technical fantasy in the ancient world on popular TV shows like Star Trek Babylon 5 Battlestar Galactica and Dr Who

The African Diaspora Patrick Manning, 2010-03-05 Patrick Manning follows the multiple routes that brought Africans and people of African descent into contact with one another and with Europe Asia and the Americas In joining these stories he shows how the waters of the Atlantic Ocean the Mediterranean Sea and the Indian Ocean fueled dynamic interactions among black communities and cultures and how these patterns resembled those of a number of connected diasporas concurrently taking shape across the globe Manning begins in 1400 and traces the connections that enabled Africans to mutually identify and hold together as a global community He tracks discourses on race changes in economic circumstance the evolving character of family life and the growth of popular culture He underscores the profound influence that the African diaspora had on world history and demonstrates the inextricable link between black migration and the rise of modernity Inclusive and far reaching The African Diaspora proves that the advent of modernity cannot be fully understood without taking the African peoples and the African continent into account

Film, 1980

Selling James Bond Tanya Nitins, 2011-08-08 The character of James Bond for many people is intrinsically linked in their minds with particular brands Aston Martin Bollinger Omega Smirnoff vodka and so on This direct association between character and brand highlights the intrinsic role of product placement in the film industry and in the James Bond films in particular Selling James Bond Product Placement in the James

Bond Films provides a comprehensive overview of the history of product placement in the James Bond series charting the progression of the practice and drawing direct correlations to significant cultural and historical events that impacted upon the number and types of products incorporated into the series While primarily a financial arrangement it is also important that the practice of product placement be examined and understood in relation to these cultural contexts an area of research so far largely ignored by academic study Through extensive content analysis of the official James Bond film series as well as utilising directors commentary and industry reports this book illustrates the strong impact specific cultural and historical events have had on the practice of product placement in the series In doing so it provides an exciting and in depth behind the scenes look at the James Bond film series and its complicated and sometimes contentious history of product placement In the process it charts the gradual emergence of product placement from the more traditional background shot to becoming so embedded in the actual film narrative that they have become simply yet another method for filmmakers to produce cultural meaning

Aeronautics and Space Report of the President United States. President, *Aeronautics and Space Report of the President ... Activities* United States. President,1973

The Cinema in Flux Lenny Lipton,2021-04-07 The first of its kind this book traces the evolution of motion picture technology in its entirety Beginning with Huygens magic lantern and ending in the current electronic era it explains cinema s scientific foundations and the development of parallel enabling technologies alongside the lives of the innovators Product development issues business and marketplace factors the interaction of aesthetic and technological demands and the patent system all play key roles in the tale The topics are covered sequentially with detailed discussion of the transition from the magic lantern to Edison s invention of the 35mm camera the development of the celluloid cinema and the transition from celluloid to digital Unique and essential reading from a lifetime innovator in the field of cinema technology this engaging and well illustrated book will appeal to anyone interested in the history and science of cinema from movie buffs to academics and members of the motion picture industry

Adversaries of Dance Ann Louise Wagner, 1997 Whether in the private parlor public hall commercial dance palace or sleazy dive dance has long been opposed by those who viewed it as immoral more precisely as being a danger to the purity of those who practiced it particularly women In *Adversaries of Dance* Ann Wagner presents a major study of opposition to dance over a period of four centuries in what is now the United States Wagner bases her work on the thesis that the tradition of opposition to dance derived from white male Protestant clergy and evangelists who argued from a narrow and selective interpretation of biblical passages and that the opposition thrived when denominational dogma held greater power over people's lives and when women's social roles were strictly limited Central to Wagner's work which will be welcomed by scholars of both religion and dance are issues of gender race and socioeconomic status There are no other works that even begin to approach this definitive accomplishment Amanda Porterfield author of *Female Piety in Puritan New England*
