William Harvey and the Circulation of the Blood Thomas Henry Huxley,2017-06-03 I DESIRE this evening to give

you some account of the life and labours of a very noble Englishman William Harvey William Harvey was born in the year 1578 and as he lived until the year 1657 he very nearly attained the age of 80 He was the son of a small landowner in Kent who was sufficiently wealthy to send this his eldest son to the University of Cambridge while he embarked the others in mercantile pursuits in which they all as time passed on attained riches William Harvey after pursuing his education at Cambridge and taking his degree there thought it was advisable and justly thought so in the then state of University education to proceed to Italy which at that time was one of the great centres of intellectual activity in Europe as all friends of freedom hope it will become again sooner or later In those days the University of Padua had a great renown and Harvey went there and studied under a man who was then very famous Fabricius of Aquapendente On his return to England Harvey became a member of the College of Physicians in London and entered into practice and I suppose as an indispensable step thereto proceeded to marry He very soon became one of the most eminent members of the profession in London and about the year 1616 he was elected by the College of Physicians their Professor of Anatomy It was while Harvey held this office that he made public that great discovery of the circulation of the blood and the movements of the heart the nature of which I shall endeavour by and by to explain to you at length Shortly afterwards Charles the First having succeeded to the throne in 1625 Harvey became one of the king s physicians and it is much to the credit of the unfortunate monarch who whatever his faults may have been was one of the few English monarchs who have shown a taste for art and science that Harvey became his attached and devoted friend as well as servant and that the king on the other hand did all he could to advance Harvey s investigations But as you know evil times came on and Harvey after the fortunes of his royal master were broken being then a man of somewhat advanced years over 60 years of age in fact retired to the society of his brothers in and near London and among them pursued his studies until the day of his death Harvey s career is a life which offers no salient points of interest to the biographer It was a life devoted to study and investigation and it was a life the devotion of which was amply rewarded as I shall have occasion to point out to you by its results Harvey by the diversity the variety and the thoroughness of his investigations was enabled to give an entirely new direction to at least two branches and two of the most important branches of what now a days we call Biological Science On the one hand he founded all our modern physiology by the discovery of the exact nature of the motions of the heart and of the course in which the blood is propelled through the body and on the other he laid the foundation of that study of development which has been so much advanced of late years and which constitutes one of the great pillars of the doctrine of evolution

[I Wanna Iguana](#) Karen Kaufman Orloff,2004-09-09 Hilarious notes between a son and his mom show how kid logic can be very persuasive Alex just has to convince his mom to let him have an iguana so he puts his arguments in writing He promises that she won t have to feed it or clean its cage or even see it

if she doesn't want to. Of course Mom imagines life with a six-foot-long iguana eating them out of house and home. Alex's reassures her. It takes fifteen years for an iguana to get that big. I'll be married by then and probably living in my own house. His mom's reply: How are you going to get a girl to marry you when you own a giant reptile? Kis will be in hysterics as the negotiations go back and forth through notes and the lively imaginative illustrations showing their polar opposite dreams of life with an iguana take the humor to even higher heights. *Guinea Pig Scientists* Leslie Dendy, Mel Boring, 2005-06.
